

SOONFIRE

CE RoHS  

Any questions, please welcome here.
We will reply you within 12 hours included
the weekend.

Powered by one 18650 battery or 2 x CR123A
**Please tightening up the End Cap
and the Body before you use it
or recharge the flashlight.**

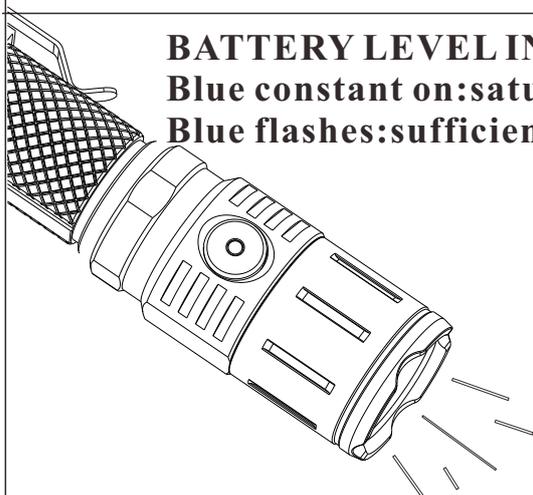

Side switch

Tail switch

1. Tail switch for turning on /off the flashlight directly
2. Side switch for mode changing

Using:

1. Half press the tail switch to enter the tactical lighting mode, release the tail switch to exit.
2. Fully press the tail switch to enter the illumination mode, click the side switch to adjust the brightness: micro-low-middle-high-ultra brightness in cycle.
3. Press the side switch for 1.5 seconds to enter the Strobe mode, then click the switch to enter the SOS mode and the Slow Flash mode. Press the side switch for another 1.5 seconds to go back to the illumination mode.
4. Quickly double-click the side button to directly change to the ultra-bright illumination mode.
5. Turn off the flashlight and memorize last used illumination mode.

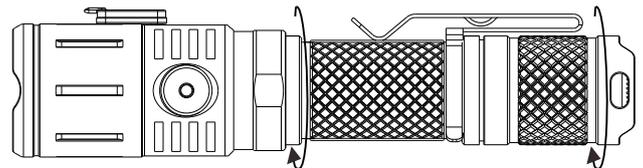

BATTERY LEVEL INDICATION

Blue constant on:saturated

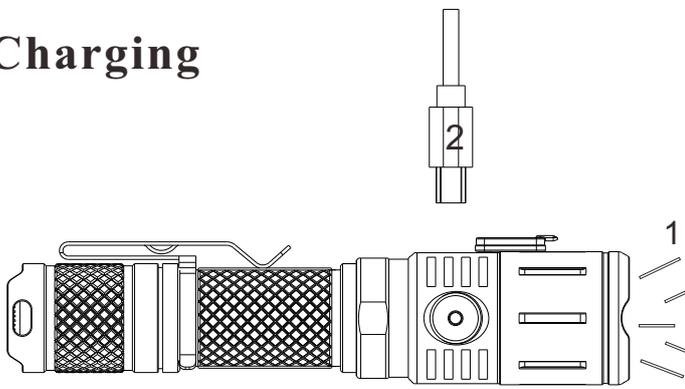

Blue flashes:sufficient

Red constant on:poor
Red flashes:critical
(The flashlight will automatically jump
to the lowest brightness mode)

To avoid accidental activation, a very slight
2mm loose the body can disconnect the
battery to the tail cap and completely
lockout the light.
Please be sure to recharge the flashlight
once within every three month.

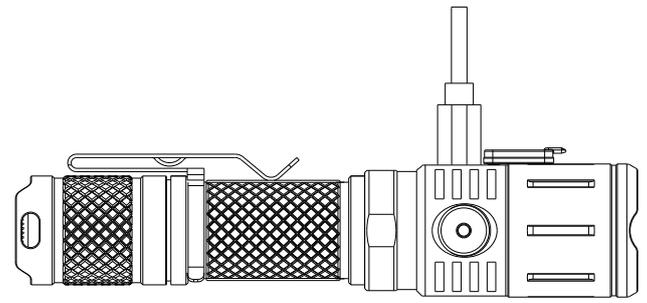

Charging

1. With the flashlight on
2. Plug in the Micro USB Cable

⑥

Charging

When the flashlight is in charging status, flashlight will automatically turn off and the red indicator at the switch position blinks once every 1.5 seconds.

⑦

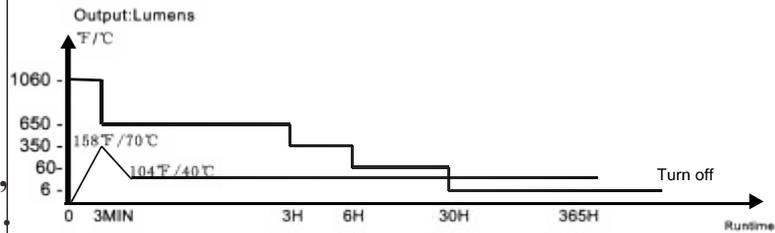

Charging NOTE:

When you plug in usb cable, the indicator in side switch will show a rapid dim fast-flashing of red, which means a power source is detected, but the battery didn't connect to power source.

1. Tighten the End Cap and the Body properly.
2. Press the tail switch to turn the light on (the same as you turn on the flashlight). Then the charging indicator slow blinking red. Steady blue light shows fully charged.

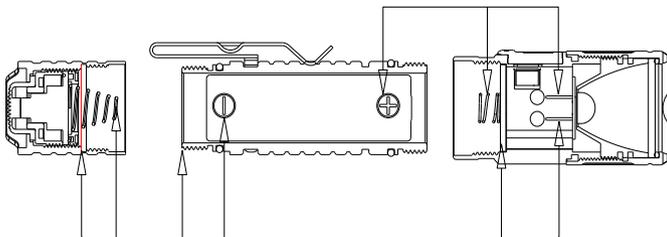

⑧

ITS Smart Temperature Control System

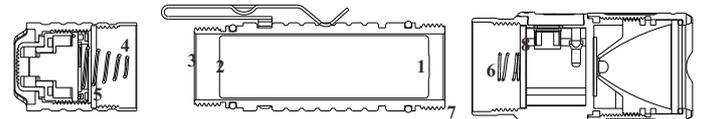

1. Brightness automatically decreases with time.
2. The high brightness mode has a limit of 3 minutes.
3. It equipped with Thermal management safety program with overheat protection.
